## MIDOCCEAN DISASTER

Steamer Pomeranian Swept by Mighty Seas.

LIVES OF TWELVE MEN LOST.

Passengers, Officers and Crew Wounded and Swept Overboard—Deck Saloon, Charterhouse, Bridge and Boats Smashed. The Vessel Navigated Back to Greenock Without Charts.

LONDON, Feb. 13.—The Allan Line steamship Pomeranian, from Glasgow, Jan. 27, via Moville, for New York, has returned to Greenock in distress, after having met with one of the most fatal accidents that have occurred to transatlantic steamers for many years, an accident that resulted in the loss of twelve lives.

The following is the list of dead: W. Dalziel, master of the vessel, both legs broken and internal injuries, resulting in death.

John Cook, second officer, swept overboard.

John Hamilton, fourth officer, swept overboard.

John Stewart, of Glasgow, first cabin passenger, both legs broken and internal injuries, resulting in death in a few hours.

James Gibson, of Dalkeith, first cabin passenger, swept overboard.

Lillian Gibson, of Dalkeith, first cabin passenger, swept overboard.

Jane Caffrey, of Londonderry, first cabin passenger, swept overboard.

David Forbes, of Dundee, second cabin passenger, washed overboard.

James Pritchard, steward, swept overboard.

Fred Westbury, steward, swept overboard.

Peter McLean, seaman, swept overboard.

William Urquhart, seaman, swept overboard.

The disaster occurred when the steamer was about 1,150 miles out. The Pomeranian encountered boisterous weather immediately after leaving port. It was thought that the wind would soon blow itself out, and with everything shipshape no fears for the safety of the steamer were entertained. Instead of abating, however, the gale increased in severity until the day of the disaster.

The 4th of February dawned with a frightful gale raging, and a tremendous high sea running. The hatches were battened down and covered with tarpaulins, ventilators were turned to leeward, and every precaution dictated by good seamanship had been taken to prevent water getting below. This appeared to the officers of the ship to be the greatest danger, as they had no doubt as to the steamer's ability to ride out the storm. Several seas had been shipped, but they did no damage.

Suddenly a tremendous sea reared its crest a short distance ahead of the steamer as she plunged down a wave. Before she could rise the sea came over the starboard bow, and tons of water rushed aft. Almost at the same time a falling wave astern pooped the steamer. The result almost defies description. The deck saloon, charterhouse, the bridge and the boats were smashed to pieces and partly washed overboard. The deck was covered with an almost inextinguishable mass of wreckage, and the utmost confusion reigned. At first the full extent of disaster was not known.

The steamer began to pay off before the wind and sea, and it was at once seen that the quartermaster had been carried away. Two sailors sprang to the wheel and soon put the steamer on her course. Then it was found that Captain Dalziel, the master of the steamer, was missing. He had been last seen standing on the lee side of the steamer, aft the saloon, in conversation with a saloon passenger named John Stewart, a resident of Glasgow. They had both been caught by the sea that came over the stern and dashed against the deck-house. They were then carried with terrific force and jammed beneath the after steam winches.

Captain Dalziel's legs were broken, and he had sustained internal injuries. He was carefully removed to his room, and everything possible was done for him, but he died the next morning. Mr. Stewart's legs were also broken, and he sustained other injuries, from the effects of which he died in a few hours. At the time of the accident the second officer, John Cook, had the watch. He was on the bridge with John Hamilton, the fourth officer, and both were carried overboard and drowned.

In the saloon deck-house, when the sea broke over the steamer, were James Gibson and Lillian Gibson, of Dalkeith, and Jane Caffrey, of Londonderry, all first cabin passengers. They were carried over the side and not afterward seen. David Forbes, of Dundee, a second cabin passenger, and James Pritchard and Fred Westbury, stewards, were also lost in the same manner. This made the number of those carried overboard ten, with the two others fatally injured.

When the sea boarded the steamer every man about deck who saw it coming grabbed hold of stanchions or anything else convenient, and it was due to this that the loss of life was not much larger.

With Captain Dalziel fatally injured and unconscious in his cabin, the command of the steamer devolved upon the first officer. The steamer was about in midocean and the question arose in his mind what course to pursue, whether to hold the steamer on her course or to put about and make for Greenock. When the chartroom was carried away, the charts, sextants and quadrants, in fact, everything absolutely essential to the navigation of the ship went with it.

The pinnacle box and its compass had also gone overboard, and had it not been that the after compass remained it is doubtful if the steamer would have reached port for many days yet.

The situation of affairs on the Pomeranian, it is almost needless to say, was terrible. The first officer called the remaining officers of the steamer to a consultation, and it was decided to put about and return to Greenock. This was at once done, and without any instruments with which to take observations the voyage had to be made entirely by dead reckoning, and was therefore necessarily slow.

The first officer is highly commended for his skillful seamanship in navigating the Pomeranian under such adverse circumstances, and it is highly probable that his ability will be recognized in a substantial manner by the owners of the steamer and the underwriters.

SAD PROSPECTS AHEAD OF US.

Indications Point to Renewed Ravages by the Asiatic Scourge.

BERLIN, Feb. 13.—Dr. Kempster, a special health officer of the United States, has just arrived in Berlin, after a tour of inspection of Hamburg, Bremen, Cassel and Nettleben. He told a newspaper representative that he was convinced that the present year would witness a fierce outburst of cholera all over the continent, and that instead of being sporadic, as in 1892, the plague would sweep the whole of Europe.

Dr. Kempster related an ominous incident connected with his visit to a certain large town, the name of which he desired to reserve for his official report. He asked the local health officer to take him to the worst slum in the town.

"There is none," said the officer, "every slum and fever hole has been cleared out."

Dr. Kempster then took the officer to a certain back alley, the sight and smell of which made both of them retreat with handkerchiefs to their noses. He afterward offered to show the official half a dozen other places of the same sort in the vicinity. The inference is that the local sanitary reports are unreliable.

Dr. Kempster also discovered discrepancies between the published figures of the mortality from cholera and the number of cases registered on government lists. In one town the local health officer told him that the total number of cases of cholera was thirty-eight, but obtaining access to the official record he found that there had really been 780 cases, of which 350 had been fatal. The doctor said that the towns alluded to were not in Germany. They are probably in Russia.

Dr. Kempster also related the following incident: A Bremen lighterman and his assistant died of cholera aboard their boat while lying off the city. The boat was sent to Hamburg, no one in Bremen, as far as is known, having boarded it or come in contact with it in any way.

Several weeks afterward a widow and her daughter, living at the riverside, died of Asiatic cholera. The source of infection in these cases could not be traced until Dr. Kempster, co-operating with a Hamburg officer, proved that the widow had washed some clothes from the lighter boat.

Regarding rats imported into the United States from infected ports, Dr. Kempster is inclined to agree with the suggestion of Consul General Edwards that disinfection on arrival in the United States would be surer and more effective than mere disinfection before shipment.

NICE DISTURBED.

The Cholera at Marseilles Causes Uneasiness.

NICE, Feb. 13.—Quite a flutter of excitement was caused here when people in the Place Massena read a bulletin announcing that cholera had been officially declared at Marseilles. The carnival is in full swing here, but leading local medical authorities reassure those now on the Riviera.

Dr. Thomas Linn, an American practitioner, says: "Certain of the symptoms described in the cases that have occurred in Marseilles look as if it was cholera. In any case, it will not do to rest in a state of dangerous tranquillity when conditions exist that are admitted to be bad."

"In October last I examined personally the sanitary state of Marseilles. It left a good deal to be desired. It is better to look the danger straight in the face than to label it by name unknown, and cause the suppression of the real facts. Every American I see asks about the chances of cholera in Europe this summer."

"For myself, I do not believe it will come this year, for, judging from past epidemics, it usually skips the year following the original outbreak, but comes again the third year—that is to say, it would not come this year, but we might expect it in 1894."

Choleraic Epidemic.

MARSEILLES, Feb. 13.—During the past twenty-four hours eight persons died of choleraic epidemic and several fresh cases were taken to the hospital. Two patients were discharged as cured from the hospital. The Swedish consul has refused to issue clean bills to vessels sailing for Swedish ports. A five days' quarantine has been established by the Greek government for all arrivals from this port.

Lumber Firm Assigns.

INDIANAPOLIS, Feb. 13.—The Indianapolis Lumber company, composed of D. A. Williamson and E. A. Shoby, made an assignment Saturday and E. C. Foster was appointed receiver. The assets are about \$32,000 and the indebtedness \$10,000 in excess of that amount.

Five Fires in One Day.

TOLEDO, Feb. 13.—The city had five fires Friday, all due to natural gas. About \$30,000 will cover the losses.

## WORK OF FIREBUGS.

Three Big Conflagrations in Nashville, Tenn.

ALL IN TWENTY-FOUR HOURS.

The Total Loss Will Reach \$284,000, on Which There is About \$180,000 Insurance—The Banner Newspaper Building Among Those Destroyed.

NASHVILLE, Tenn., Feb. 13.—Firebugs are undoubtedly at work in this city. Shortly after 10 o'clock Saturday night fire broke out in the building occupied by Sol Frankt & Company. The fire department was summoned and succeeded, after an hour's work, in getting the fire under control. The loss is estimated at \$70,000.

About 2 o'clock yesterday morning as the firemen were extinguishing the fire of Frankt & Company's building the sound of crackling flames was heard in J. H. Fall & Company's building next door. A few moments later a mass of flames shot up through the first floor of the building, and as the front door was broken open by an ax the smoke burst forth in a suffocating mass. The whole department turned their attention to the new fire which spread with wonderful rapidity. The firemen succeeded by ladders in getting into the upper windows and getting a stream upon that part of the building.

As the fire spread along the lower floors of the building, a thousand rifle and pistol cartridges stacked in the rear of the house exploded, producing a sound that scattered the crowd in all directions. In a short time the fire had gained such headway that it was not possible to prevent the building and its contents from being a total loss, and the firemen devoted their efforts to prevent the flames from taking in the block.

In this they were successful. J. H. Fall & Company carry \$135,000 of stock and about \$94,000 insurance.

The Globe Clothing company, located next door, lost \$30,000; insurance \$20,000. Damage principally from water.

At 11 o'clock yesterday morning fire was discovered in the block on Union street occupied by the City Savings bank, Hildebrand, jeweler, and Miss Isler, milliner. A portion of the stock was burned and the buildings flooded with water. The loss is all covered by insurance.

At 6:30 last night the fire signal was turned in for the third time in twenty-four hours and it was soon discovered that The Evening Banner building, occupied by The Banner, as a newspaper office, and by Haslock & Ambrose, job printers, was in flames. The fire started in the second floor under the staircase in a receptacle for holding kindling wood and under suspicious circumstances. The building was a four-story one, in the very heart of the city near the American building, the Maxwell House, and adjoining the Baxter Court, an immense seven-story office building.

All the engines were on the spot and confined the flames to the Banner building. The loss is \$25,000, covered by insurance. The Baxter building was slightly damaged by fire and water. Haslock & Ambrose, job printers, in the Banner building, lost \$10,000; insurance, \$6,000.

The total loss caused by the fires is \$284,000; insurance, \$180,000.

PREPARING FOR INAUGURATION.

Probably Twenty Thousand Men Will Participate in the Parade.

WASHINGTON, Feb. 13.—The work of the committees having charge of the ceremonies incident to the inauguration of President-elect Cleveland is progressing satisfactorily. General McMahon and Colonel Corbin, who have supervision of the arrangements for the parade, are daily receiving applications from military organizations all over the United States for positions in the line. More than a hundred civic organizations, including Tammany, have thus far reported a probable strength of over 17,000 men to form in line on March 4.

The governors of the following named states have notified the committee that they will be in line accompanied by members of their staffs, and in many instances by independent military companies: Delaware, Pennsylvania, New Jersey, Georgia, Connecticut, Massachusetts, Maryland, North Carolina, South Carolina, Virginia, Ohio, Louisiana and Wisconsin.

It is almost certain that a majority of the governors of the remaining states will be present, but as yet they have not notified the committee. Pennsylvania, as usual, will send the largest representation of any state. Its full national guard of 8,600 men will be in line. New York will send its crack organizations—the Seventh and Sixty-ninth regiments—and probably company A of the Thirtieth regiment (Brooklyn).

The following independent organizations have notified the committee to reserve their positions in the line: Georgia Hussars, Monumental City Guards and Baltimore Rifles, Palmetto Guards of Charleston, Cleveland Troop and Alliance Guards, Ohio, and the Fort Worth Fencibles, Texas.

There is every probability that the inauguration of March 4, 1893, will surpass all its predecessors.

Slides in a Tunnel.

VILLA GROVE, Colo., Feb. 13.—A slide occurred in one of the tunnels of the Orient mine of the Colorado Fuel and Iron company yesterday killing six men and severely injuring as many more. The dead are: James H. Morgan, Hugh Connolly, Mike Novak, Ed Johnson, Ed Carter and P. J. Breen.

SENATE COMMITTEES.

Changes That Will Be Made After the Fourth of March.

WASHINGTON, Feb. 13.—In anticipation of the fruits of the recent victory, the Democrats are now discussing the probable changes in the senate committees. One of the most important of these is that on finance, which will be presided over by Mr. Voorhees, who is the ranking member of the Democratic side.

There is no reason to believe that the usage of the senate will be violated, although there was some talk, while Mr. Carlisle was in the senate, and before he was considered as a cabinet officer, of making him the chairman of the committee. The Republican membership will remain undisturbed, the present majority of the party being reduced to the requisite minority by the retirement of Mr. Hiseock, whose term expires with this congress.

The guessing is entirely on the side of the Democrats. It has been said that Mr. Harris, owing to his succession to the chairmanship of the District of Columbia committee, will withdraw from the finance committee, but while this would be glad news to some Democrats, who wished to get this desirable berth, it is unlikely that the senator from Tennessee will relinquish his share in the work of this committee, which he finds so congenial to his tastes.

Mr. Carlisle, of course, retires, and that leaves one sure place for another Democrat. Mr. Vest, of Missouri, is said to have a wish to get upon this committee, and his friends are reported to be at work in his interest, while it is also true that the south is demanding another representative in addition to Mr. Vance, of North Carolina. Mr. Mills is said to be the man whom the southern senators will put forward for this place.

Owing to the fact that there will be but one vacancy, although it is rumored that Mr. Harris may retire, there will be a clash of interests, and even with two openings there is likely to be more or less friction. It is whispered about the senate chamber that Mr. Cleveland has expressed a wish to have one of his personal friends upon this committee, and Mr. Vilas is looked upon as the natural choice of the president-elect.

NORVIN GREEN DEAD.

For Sixteen Years President of the Western Union Telegraph Company.

LOUISVILLE, Feb. 13.—Norvin Green, president of the Western Union Telegraph company, died at home in this city at 7:30 o'clock Sunday morning. His death was caused by bowel complaint, from which he had been an acute sufferer for one week.

Dr. Green, as he was known by people of this city, his home, had not been well for several years. Six weeks ago he sought rest in the seclusion of his Louisville home. One week ago yesterday he was taken suddenly ill with diarrhea and failed steadily, his death occurring yesterday morning at the hour stated above.

The funeral will take place here Thursday. Vice President John Van Horn, General Manager T. E. Eckert, and the board of directors of the telegraph company, thirty in number, will be present. The interment will be in the family lot in Cave Hill, this city.

Norvin Green was born in New Albany, Ind., just across the Ohio river from Louisville, April 17, 1818. He secured a country school education, was a graduate of the University of Louisville with degree of M. D. in 1840, and married Miss Martha English, of Carroll county, in the following year. He had hardly attained his majority at this time. He gained some political influence, and in 1853 was appointed disbursing agent for the custom house, then in process of erection here. His interest in telegraph matters began a year later when he formed a syndicate to purchase the almost bankrupt People's New Orleans and Cincinnati telegraph lines. His fine organizing abilities were soon shown by the payment of dividends, the first ever declared in the telegraph business. He directed the Western Union deal which merged every American line in that company. Upon the death of President William Orton, Norvin Green was chosen unanimously to succeed him. Every year since that time, 1877, he had continued to fill that position. He leaves a widow and six children.

HAS A TREATY BEEN VIOLATED?

British Subjects Imprisoned in the Detroit House of Correction.

DETROIT, Feb. 13.—Chong Fong and Jong Bong, two Chinese, who were arrested in Port Huron charged with being illegally in the United States, have been tried before a United States circuit court commissioner at Port Huron and sentenced to ten days' imprisonment in the Detroit house of correction.

They had in their possession Canadian naturalization papers, showing that they are British subjects. Accordingly they will be deported back to Canada at the expiration of their sentences. A prominent lawyer here thinks that this case may lead to complications between the American and Canadian governments, as it may, perhaps, be deemed a breach of the treaty between the two countries.

Miss Dis De Bar Indicted.

GENEVA, Ills., Feb. 13.—Vera P. Ava, alias Dis De Bar, was indicted by the grand jury Saturday charged with the larceny of \$735 from Irene Mitchell, of Elgin. Another count charges her with obtaining money by representing that she was in league with spirits. Vera Ava has been in jail here for several months.

No Let Up of Zante's Earthquakes.

ATHENS, Feb. 13.—The island of Zante was shaken yesterday by several earthquakes, and the panic among the inhabitants is increasing.

## AT THE WHITE HOUSE

Hawaiian Commissioners Received by the President.

OFFICIALLY RECOGNIZED.

They Are Referred to the Secretary of State—A Conference Follows, but No Definite Conclusion Was Reached—For the Present Minister Stevens May Simply Be Upheld—Objections Urged Against Annexation Detailed by the Envoys—The Disadvantages to Be Encountered Upon the Islands Are Coolies and Lepers.

WASHINGTON, Feb. 13.—The statement made from here in some special dispatches that the president had finally decided upon annexation of Hawaii, and would so inform congress in a special message, had no authority from the White House, and was based upon a surmise as to his action.

The president has as yet made no statement to anybody as to what course he will take in the matter, but the belief is that he will not take the extreme ground ascribed to him, but will endorse the action of Minister Stevens in establishing a protectorate, and may possibly make recommendations calculated to strengthen the position taken by the latter.

President Harrison informally received the Hawaiian commissioners and accepted their credentials as representatives of the present provisional government Saturday afternoon. The commissioners previously called at the state department and held a conference with Secretary Foster as to the form of a presentation. When they reached the executive mansion they were ushered into the blue parlor. They laid aside their coats and hats, as Secretary Foster excused himself for a few minutes and went up stairs to escort the president to the blue room. He was evidently expecting them, for he did not keep them waiting.

Secretary Foster presented each member of the commission to the president separately, and when that formality was over they presented their credentials to the president, who accepted them and referred them to the secretary of state to be placed on file in the department. There was a brief, but informal, reference to Hawaiian affairs, after which the commissioners were invited to make an inspection of the state department and the conservatory.

The president intimated to the commissioners that negotiations which formed the subject of their mission would be conducted by the secretary of state. The commissioners accordingly repaired to the state department at the close of the ordinary routine day's business and laid before Secretary Foster in detail the practical proposition they were authorized to submit. Their conference with him commenced about 4 o'clock and lasted an hour and a half.

Some progress was made as to arriving at a harmonious view of the exigencies of the situation, but no definite conclusion was reached, and the conference was adjourned till Monday.

The commissioners at the meeting detailed the objections urged against the annexation of the islands.

Speaking on behalf of his fellow commissioners Mr. Thurston said in regard to the obstacle of the Coolie faction: "Every legisla-ture of recent years, except that, probably, of 1887, has contained a majority of native members. The natives themselves are responsible for the introduction of the Coolies of China into the island and they have resisted every effort that has been made by the Reform party to restrict the immigration of that class. They have no one to blame for the presence of the Coolies in Hawaii except themselves."

On the matter of leprosy he had also this to say: "If it were not for the constant struggles maintained by the whites the present segregation laws which compel those afflicted with the loathsome disease to be transported to the leper settlement the natives in the legislature would speedily repeal even that beneficent measure, thereby throwing down all bars against its spread over the entire country."

"Since the appearance of the first authenticated case there have been probably 5,000 cases of leprosy on the islands; at present there are probably 1,100 of the unfortunate in the leper settlement. Of these the percentage of the whites is almost infinitesimal. The percentage of cases among the whites has not exceeded the deaths from diphtheria in an average American village."

Mr. Thurston said after the conference that they had received no assurance as to the action of the president, but were very hopeful of the result sought by them.

Commissioner Marsden said: "We are delighted at receiving official recognition from the president. That is what we have been anxiously waiting for since our arrival."

Will Probably Fight.

LOUISVILLE, Feb. 13.—Representatives of the Louisville and Nashville engineers were in conference Saturday considering the question of striking. The vote cast pro and con by the divisions of the brotherhood has been counted and the result forwarded to Chief Arthur, but the conclusions will not be known for several days. It is reported unofficially, and generally believed, that the engineers will strike and that the firemen will follow them.

Will Continue to Fight.

LONDON, Feb. 13.—The Lancashire operative spinners have resolved to continue their fight against the master spinners. The strike pay has been reduced 50 per cent. by the unions.

The people of Newport are no better pleased with the proposed charter for that city than the people of Maysville are with the proposed charter for cities of the fourth class. The Journal says: "That the charter adopted by the Re- visory Commission for cities of the second class would, if adopted, 'tie Newport hand and foot and deliver it to the officials as a gracious gift. It is crude, ill-digested, cumbersome; it provides for officials not responsible to the citizens, and for a legis- lative department modeled on the old style and with equal opportunities for getting things through in short order and without time for proper consideration. The Auditor would be the absolute finan- cial autocrat of the city; the Police Court would be a political machine; the num- ber of boards would make it exceedingly difficult to fix responsibility, and, once in operation the citizens might resign them- selves to no further concern in the affairs of Newport." **Kentucky's Exhibit.** President W. RANDOLPH HARDIMAN, of Paris, son of Mr. and Mrs. R. M. Hardiman formerly of this city, was painfully injured last week by being thrown from a horse at Lexington. The animal scared at an electric car.

MORRIS, the four-weeks-old son of Mr. and Mrs. James M. Rankins, died Saturday afternoon at 4 o'clock, of pneumonia, and was buried yesterday. The parents have the sympathy of their friends in their loss.

On account of the inauguration of the President-elect at Washington, D. C., March 4th, the C. and O. will sell round trip tickets from Maysville to Washington at \$13.50. Tickets on sale February 28th, March 1st and 2nd, and for train No. 2 of March 3rd. Return limit March 8th.

The February number of the Illustrated Kentuckian contains portraits of Miss Effie May Myers, of Lexington; Miss Katherine Albert, of Maysville; Miss Drye, of Bradfordville; Miss Bell, of Shelbyville, and Miss Cardwell, of Harrodsburg. It is a very pretty group, Miss Albert being assigned the position of honor.

On the 3rd of February, H. C. Allen weighed three of his yearling bronze turkeys, a gobbler and two hens, and they pulled the beam respectively at forty-four, twenty-eight and twenty-four pounds. They would doubtless have been heavier had they been weighed previous to the severe storms.—Georgetown Times.

The eastbound F. F. V. was delayed about one hour and a half in the Covington yards last night by the air-brakes getting out of order, but when it did pull out the Flyer demonstrated that it was rightly named. It was five minutes of 8 o'clock when the train left Newport, and only twenty minutes past nine on reaching Maysville, and two stops were made on the run. The distance from Augusta to this city was covered in eighteen minutes.

EDITOR F. W. NORRIS, of the Cynthiana Times, has brought suit at Lexington against Editor Sam J. Roberts, of the Kentucky Leader, for \$100,000 damages. Norris copied an editorial from a Southern journal in his paper and failed to credit it, and Roberts, thinking Norris was the author, intimated that the editor of the Times had the "willies." He also suggested that Mr. Norris should take something when he feels another such attack coming on.

## DRAWING TO A CLOSE.

But Sixteen Days Remain of the Present Session of Congress.

WASHINGTON, Feb. 13.—But sixteen working days remain of the fifty-second congress. Only one of the annual appropriation bills—the army bill—has become a law, and from this time on until the 4th of March both houses of congress will bend every energy to the completion of the remainder of these important measures. For this reason it is uncertain whether the senate will be able to carry out the program of legislation, short as it is, arranged by the Republican caucus.

The Nicaragua canal bill is the unfinished business, but as it promises to provoke a long debate, it must, from time to time, give way to the appropriation bills and conference reports. Next to the Nicaragua bill on the caucus program is the omnibus statehood bill. Senator Carey, who is in charge of the bill, does not propose to lose any opportunity to advance it, and when recourse is had to the calendar, on which the bill occupies a favorable position, he will endeavor to press the measure without waiting for action on the Nicaragua bill.

It is possible that the senate may be plunged in a financial discussion any day in the week should Mr. Sherman call up the amendment to one of the appropriation bills of which he has given notice, authorizing the secretary of the treasury to sell bonds to maintain specie payments under the resumption act.

Now that the silver question is definitely shelved for this congress the leaders in the house do not see anything ahead between now and the 4th of March to cause trouble except the appropriation bills and the anti-options bill. It is proposed to keep the house pounding away on the appropriation bills with but little intermission until the last one of them is sent over to the senate. Those still remaining before the house are the pension (which is under consideration), the postoffice, the Indian, the agriculture and the naval bills.

Today is District of Columbia day, and as the district lost its day two weeks ago it will doubtless be conceded the floor today. The remainder of the week will be occupied mostly with the several appropriation bills, though there is some prospect that a special order may be brought in in behalf of the New York and New Jersey bridge bill, for which measure a cloture petition has been presented to the rules committee, or of the agricultural committee, which has the anti-options, pure food and other bills in charge.

## TWO BIG GUSHERS.

Saturday Was a Great Day in the Ohio Oil Fields.

TOLEDO, Feb. 13.—There is considerable excitement in the oil fields over another big gusher which was drilled in Saturday afternoon, in what was supposed to be dry territory. The well is on the Hoagland farm, in Middletown township, twenty miles south of Toledo. It is flowing over 1,000 barrels a day and can not be shut in. The oil is running all over the country. The pressure is so strong nothing can be done to save it. No tankage had been placed, as the prospectors did not expect much of a well.

A well almost as great was drilled in Saturday a few miles south of this point. These wells extend the field to an extent sufficient to keep the drill going all the summer.

## A Cup Defender.

BOSTON, Feb. 13.—The Journal says that while it is not absolutely certain, the chances are favorable for the building of a cup defender by a Boston syndicate, the members of which are not made public; that if built the boat will be about an eighty-five footer, designed by Stewart & Binney, the successors to Burgess; that it will be built probably by either Lawley, of South Boston, or the Atlantic works, and the boat will be managed in all races by George Stewart, designer, who will be assisted by Charles F. Adams, second, and his brother, George C. Adams.

## Defaulter's Dead Body Found.

BELLAIRE, O., Feb. 13.—Harry G. Wilson, the defaulting superintendent of the city water works of over \$3,000 who disappeared Nov. 18, was found yesterday by two small boys in a thicket twelve miles east of Wheeling, where he had killed himself. He had destroyed every means of identification, but was easily identified by his friends when brought back to Wheeling. He had been superintendent seventeen years and his ruin was caused by drink. He shot himself twice with a bull dog revolver and was embedded in the snow and ice when found.

## An Arctic Expedition.

LONDON, Feb. 13.—Sunday's newspapers published the plans of Frederick Jackson, F. R. G. S., to make an Arctic expedition. He will leave next summer with a party of eleven, will establish a depot on the southern coast of Franz Josef Land, and from this depot as a basis of operations will explore northwards the first of the summer. He will return to the depot before winter, and a year from next spring will go northward again, establishing along his route a series of depots until he reaches latitude 84 or 85, where he and his party will winter.

## His Expectation Realized.

JACKSONVILLE, Fla., Feb. 13.—A negro named Pick was lynched near Plant City, in Hillsborough county, Thursday night. He had shot and dangerously wounded a night watchman the night before. The town marshal had him under arrest and was going to Plant City with him for the purpose of placing him in jail there, when a mob met the officer and took the prisoner from him. Pick confessed and said that he expected to be lynched for it.

## Result of a Street Duel.

BIRMINGHAM, Ala., Feb. 13.—T. T. Kirk, postmaster at Guin, Marion county, was shot and killed in a street duel at that place, Saturday, by Dock Sides, a notorious fellow about the neighborhood. The killing was the result of an old feud. One of Sides' brothers was wounded in the fight. Kirk was one of the leading citizens of the place and respected by all.

## QUARRY DISASTER.

Seven Men Killed Instantly, and Others Injured.

RUTLAND, Vt., Feb. 13.—One of the worst disasters in the history of marble quarrying occurred at West Rutland a little after 1 o'clock Saturday afternoon in a quarry operated by the Vermont Marble company, with which Senator Proctor is connected. A great mass of stone fell into the quarry and seven men were instantly killed and a number of others were injured. The victims were crushed so that some of them could not be recognized. The victims were a gang at work channeling and taking away refuse, and were all middle-aged men.

The killed are: William Lukas, Frank Sulig, Edward Powers, Alexander Blumquest and three unrecognized men.

The injured are: James Dooley, leg broken; John Dunn, slightly injured; Charles Anderson, slightly injured; Fred Marchand, arm broken; Anton Ractio, slightly injured; John C. Anderson, slightly injured; Peter Grenier, slightly injured; John Michan, slightly injured about the head; Michael Cupps, slightly injured.

The cause of the caving in of the quarry is not positively known. The mass of stone which covered the men who were at work close by was, as near as can be estimated, sixty feet in length and twenty feet wide. It fell without the least warning, and all who were at work there were at once covered.

E. B. Morse, treasurer of the Vermont Marble company, says that the cause of the accident is not certain, though the "scale," or part of the roof that fell was probably loosened by freezing. There were about eighty men at work in the quarry.

## ALMOST A HOLocaust.

Apartment House on Fire With Seventy Persons in the Building.

NEW YORK, Feb. 13.—Fire was discovered at two o'clock yesterday morning, in the basement of apartment house 1128 Broadway, just below Delmonico's. The occupants of the building and the one adjoining it, occupied by Redfern & Company, ladies' tailors, were aroused in their night clothes and began to scramble out. There were about seventy persons in the two buildings, and it seemed when the firemen arrived that many would perish. All got out themselves, however, except two, Mr. and Mrs. Bass, who occupied a flat on the top floor and they were carried down the ladder by the firemen.

The fire started in the cellar under an apothecary shop near the air shaft. It is the second fire in this place within ten days, the third in the block within a month. The damage is estimated at \$70,000. Redfern had twenty gowns, valued at from \$150 to \$250 each, spoiled.

## INDIANS RIOTING.

Several Hundred Drunk and Fighting Each Other with Knives and Clubs.

DEER RIVER, Minn., Feb. 13.—Several hundred Indians have been rioting here for three or four hours, using knives and clubs. Many of them are wounded, and probably two or three killed, though nobody at the agency dares to go near them. There are rumors of a massacre.

T. L. Vance, the post trader, has lost all control of the savages. A week ago the savages were notified that they would be paid by the government at noon Saturday. When the reds arrived and found no agent had appeared, they were furious. The explanation that heavy snowstorms had prevented the agent from coming to Deer River did not satisfy them, and after filling up on bad whisky, they took possession of the town.

## Well Known Clergyman Dead.

BROOKLYN, Feb. 13.—The Rev. John Searles, a well known Methodist clergyman, died at his home here yesterday. Mr. Searles was born in Bedford, Westchester county, and for fifty years was a member of the New York east conference of the Methodist Episcopal church. He leaves three children, one of whom is John E. Searles, the secretary of the American Sugar Refining company.

It is a harmless substitute for Paregoric, Drops, Soothing Syrups, and Castor Oil. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vomiting Sour Curd, cures Diarrhoea and Wind Colic. Castoria relieves teething troubles, cures constipation and flatulency. Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sleep. Castoria is the Children's Panacea—the Mother's Friend.

## Castoria.

"Castoria is an excellent medicine for children. Mothers have repeatedly told me of its good effect upon their children."

Dr. G. C. Osgood,  
Lowell, Mass.

"Castoria is the best remedy for children of which I am acquainted. I hope the day is not far distant when mothers will consider the real interest of their children, and use Castoria instead of the various quack nostrums which are destroying their loved ones, by forcing opium, morphine, soothing syrup and other hurtful agents down their throats, thereby sending them to premature graves."

Dr. J. F. Kinkeloe,  
Conway, Ark.

## Castoria.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me."

H. A. Archer, M. D.,  
111 So. Oxford St., Brooklyn, N. Y.

"Our physicians in the children's department have spoken highly of their experience in their outside practice with Castoria, and although we only have among our medical supplies what is known as regular products, yet we are free to confess that the merits of Castoria has won us to look with favor upon it."
